### NFU MUTUAL GILT AND CORPORATE BOND FUND, CLASS C SHARES: INCOME (SEDOL B832473) A SUB-FUND OF THE NFU MUTUAL OEIC

The fund is managed by N.F.U. Mutual Unit Managers Limited, a subsidiary of the National Farmers Union Mutual Insurance Society Limited.

#### Objectives and investment policy

##### Objective:

- To achieve income and capital growth (net of fees) over the long terms (5 years+).

##### Policy:

- This Fund will invest at least 80% in government and corporate debt (bonds), both UK and international that have investment grade credit ratings.
- The Fund may also invest up to 20% in lower credit rated corporate debt (bonds), Transferable Securities, Collective Investment Schemes (including other funds managed by NFU Mutual), Money Market Instruments, Deposits, Cash and Near Cash.
- The Fund may use financial derivatives but only for hedging or reducing risk and managing the Fund more efficiently.
- The performance of the Fund can be compared against the FTSE Actuaries UK Conventional Gilts All Stocks Index and the Markit iBoxx £(GBP) Corporate Index (combined they will be the composite benchmark).
- We have chosen the composite benchmark for this Fund, as it represents performance in the main investable assets of this Fund; gilts (FTSE Actuaries

UK Conventional Gilts All Stocks Index) and fixed-income sterling bonds (Markit iBoxx £(GBP) Corporate Index). These are widely used within the industry. The basis of the composite benchmark is a 50:50 split (FTSE Actuaries UK Conventional Gilts All Stocks Index: Markit iBoxx £(GBP) Corporate Index). The fund has the flexibility to alter the proportions invested in gilts or corporate bonds but will maintain a minimum weighting in either of 20% at any one time.

- Many funds sold in the UK are grouped into peer groups/sectors (sector) by the Investment Association (IA) (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA Sterling Strategic Bond sector. You can use this information to compare the Fund against other similar funds.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.

- This indicator is not a measure of the risk that you may lose the amount you have invested.
- The fund is in this category because the prices of bonds have moved up and down moderately in the past.

##### The indicator does not adequately capture the following relevant material risks:

- There is a risk that the issuers of the bonds the fund invests in may not be able to pay interest or repay their debt.
- Interest rate - any rises in interest rates may have adverse effect on the capital returns of the fund.
